

Hi, Welcome to the search screen for your personal mEbank program!

Here is where you are able to search through all of the transactions on all of the accounts that you have made throughout the history of using the account., and once you have a list that you are happy with, you can sort through this list by the transaction amount.

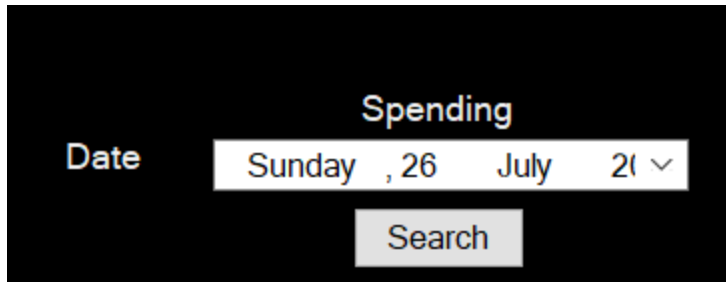

The screenshot shows a window titled "frm_query" with a dark background. At the top left is a "Back" button. Below it, there are two search sections: "Payment" and "Spending". Each section has a "Date" label, a date picker showing "Sunday , 26 July 21", and a "Search" button. Below these is a "Query Results" section with a "Hi-Lo" button on the left and a large white box labeled "lst_results". At the bottom right are "Exit" and "Help" buttons. A "Clear" button is at the bottom left.

In the top left hand side of the screen you can see a group labelled "Payment":

This is a close-up of the "Payment" search section. It shows the "Date" label, the date picker set to "Sunday , 26 July 21", and the "Search" button.

Here is where you are selected a date you would like to see the transaction record from. If you have selected a date and message box appears telling you that there is no transactions on this date, then there are no transactions on this date. If you know for sure that there was a successful transaction on this date but it is not showing up, we advise that you try rebooting the program, and if that doesn't work please call our search and sorting department at: [7553608](tel:7553608).

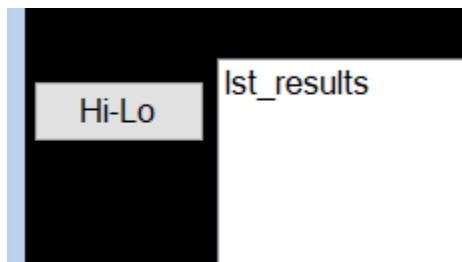

On the other side of the screen you will see a group titled "Spending":

The image shows a dark-themed interface with a form titled "Spending". On the left, the label "Date" is visible. To its right is a date selection widget showing "Sunday , 26 July 2021" with a dropdown arrow. Below the date widget is a light gray button labeled "Search".

This functions works exactly the same as the payment feature and if you are experiencing any trouble you should follow the same trouble shooting solutions as listed above.

There is another function here where by you can sort that list of transactions that you searched for by the amount that was added to them, all you have to do is click the button:

The image shows a dark-themed interface with a light gray button labeled "Hi-Lo". To the right of the button, the text "lst_results" is visible. The button is part of a larger dark gray rectangular area.

If you have pressed the clear button and then try to sort, you will not be able to and you may need to restart the program depending on how many times you pushed the button.

If this is not sorting the items in the big white box, please reboot the program or call our team at: [7553608](tel:7553608).
