## Hi, Welcome to the main page for your personal mEbank program!

This page is where most of the action in the mEbank program happens. From this page you can create new account for you to add money to, you can edit the balances in these accounts, and you can see the current balance of the account.

At the left-hand side of the screen, you can see a row to areas to enter information into, this is for the editing of the accounts in terms of adding money to any of the accounts. To add "pay" to an account, you need to enter the amount of money that you want to add to the account into the box labelled "Amount", choose from the list the account that you wish to add the money too, and then add a description for the transaction into the box labeled "Description". After doing this press enter and there will be confirmation that the transaction has been completed. If this is not working, it means that you have either missed entering in some information so make sure that all of those boxes are filled in. Or you have entered something that is not allowed, such as a letter or symbol in the amount box, or you have added a "|" into any of the boxes.

On the right-hand side of the screen, there is the same idea as adding funds, but rather this side is used for removing money from the accounts, so follow the same process as above.

Below these you can see an area that is labeled "Create Account":

Here is where you can create a new account for mEbank. You just need to type the name that you want for the new account to have and then click the create button and you will get confirmation that the account has been created. If that does not work make sure that there are no "\" in the name of the account.

Finally, at the bottom of the screen you will see a box that is labelled "Account", and next to it, there should be a label saying "Balance":

Here you can select the account that you want to see the balance of, and it will be shown on the side. If the balance says zero, you have either not selected an account, or you have not added any money to the account yet.
